Subject: Global Oil S Portland testing.

Bob and Rick

We have terminal rack testing going on next week at Global in South Portland on Clark Rd.

It is basically a modified test to load 10 trucks with Residual no 6 while attempting to quantify fugitive emissions with VOC analysis.

I was not sure I was going to be able to attend it and or have them schedule it until earlier today so for me it was not final till earlier today..

They will be doing it June 12. I asked Tom Keefe regional manager to keep you folks apprised of any changes.

Been kinda busy with work and furloughs effecting the work.

I am testing in southern mass on mon and tue so not available. Call my cell if you need.

I am not sure how long testing will take at global but it is a sort of slow going. They line up a few trucks and they seem to come every few hrs or so.
